Chad Koslovsky

Software engineering | Built with an operator's perspective

Milliken, Colorado · chad@koslovsky.xyz

Software Engineer - Agent Team | Automox

01 PROFILE

Full-stack product engineer with hands-on endpoint, managed-services and production infrastructure experience. Build TypeScript interfaces and authenticated APIs, own client applications through support, and bring operational troubleshooting into release and recovery design.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | 2015-Present

Build client applications and tenant-aware services from discovery through production support. Connect TypeScript interfaces, authenticated APIs and operational context, with direct responsibility for client IT.

Product Engineering and IT (Long-Term Contract) · NuPrice | Client engagement within Technomancy IT | 2019-2021

Built and operated a long-term client's marketplace application, including data ingestion, pricing rules, accounts and billing. Also owned support and technical operations, following customer issues across the stack.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Ran the NOC and production infrastructure across a multiyear tenure. Migrated Hyper-V/ESXi workloads into Docker/Kubernetes, handled escalations and ran SOC 1/SOC 2 audits.

Systems / Software Engineer · Office Evolution | 2014-2015

Built SQL/MongoDB applications connecting CRM, onboarding, provisioning and service operations across locations. Worked with leadership to make operational handoffs explicit.

Network & Systems Engineer · PlumChoice / Everon | 2012-2014

Engineered customer networks and endpoints in a managed-services environment, including antivirus services. Built diagnostic/support tooling, handled on-call issues and worked directly with owners and users.

Infrastructure and Systems Focal · IBM | 2010-2012

Supported enterprise infrastructure across application, vendor and business teams. Automated audit/backup workflows and managed virtualization labs and hosted desktop platforms.

03 SELECTED WORK

Technomancy | Shared business services · Founder-built platform | In development

Building TypeScript/Next.js/PostgreSQL software joining support, CRM, scheduling and billing through tenant-aware services. Implemented versioned release and recovery-verification tooling.

NuPrice | Marketplace-to-customer workflows · Long-term client engagement | 2019-2021

Built the client application connecting marketplace inputs and pricing rules with accounts, subscriptions, billing and embedded support. Owned delivery and ongoing technical operations.

Kerf and Warp | Compiler-backed application tooling · Independent framework project | In development

Building an agent-oriented TSX framework with its own compiler and Warp UI toolkit. Routing, authentication, data and actionable compiler diagnostics make application boundaries explicit.

04 CAPABILITIES

TypeScript, React/Vue and Node.js; end-to-end feature ownership · Authenticated APIs, tenant-aware services and AWS access controls · Windows, macOS and Linux support; endpoint and network troubleshooting · PostgreSQL, CI/CD, Docker/Kubernetes and production observability · Release traceability, recovery verification and direct customer support
